

Internship Management System

# Company User Manual

A step-by-step guide to posting internships and managing applicants

---

Version 1.0 | 2026

# 1. Getting started

This manual walks you through using the Internship Management System (IMS) as a company, from posting internships to issuing completion certificates.

## 1.1 Creating an account

Go to the Register page and select **Company** from the role dropdown. Fill in your email, password, representative name and role, company name, sector, RDB registration number, and company location, then click **Sign Up**.

## 1.2 Logging in

Go to the Login page, enter your registered email and password, and click **Login**. You will be taken directly to your dashboard.

# 2. Your dashboard

Your dashboard summarizes your posted internships and applicant activity, along with your most recent postings and applicants.

# 3. Posting internships

Open **Posting Internship** from the sidebar, click **+ Post internship**, and fill in the title, description, course area, location, duration, and deadline. Submitted postings appear immediately to students in matching course areas.

# 4. Managing applications

Open **Management** and select the **Applications** tab to see everyone who has applied to your postings.

- Each application shows the student's name, position applied for, school, and date.
- Click **Accept** or **Reject** to make a decision — the student is notified automatically.

# 5. Submitting progress reports

In **Management**, select the **Progress reports** tab to submit a weekly report for any active intern.

- Select the intern from the dropdown.
- Enter their attendance, grade, and a summary of tasks completed that week.
- Select their current status: On track, Needs improvement, or Excellent.

## 6. Issuing certificates

In **Management**, select the **Certificates** tab. Once an intern has completed their internship period, click **Issue certificate** to generate their digital completion certificate.

## 7. Your profile

Open **Profile** from the sidebar to view your registered company details.

## 8. Getting help

If you run into any issue, open **Help & Support** from the sidebar. You can browse company-specific FAQs, send a message to the admin team, or find the support contact details.
