

Internship Management System

School Supervisor User Manual

A step-by-step guide to monitoring your students' internship progress

Version 1.0 | 2026

1. Getting started

This manual walks you through using the Internship Management System (IMS) as a school supervisor, overseeing your students' internship placements and progress.

1.1 Creating an account

Go to the Register page and select **School Supervisor** from the role dropdown. Fill in your email, password, full name, school name, and department, then click **Sign Up**.

1.2 Logging in

Go to the Login page, enter your registered email and password, and click **Login**. You will be taken directly to your dashboard.

2. Your dashboard

Your dashboard gives a snapshot of your school's involvement in the internship program, including student numbers, partner companies, and pending items.

3. Viewing your students

Open **Students** from the sidebar to see every student enrolled from your school, along with their TVET ID, course area, and level.

4. Viewing company details

Open **Partner Companies** to see every company currently hosting students from your school.

- Click on a company card to expand it and see sector, location, and contact email.
- The number of students placed at each company is shown alongside its name.

5. Reviewing progress reports

Open **Progress Reports** to review the weekly reports submitted by companies for each of your students, including attendance, grade, and a summary of tasks completed.

6. Monitoring performance status

Open **Performance** to see each student's current performance rating — Excellent, Very Good, Good, or Needs Improvement — allowing you to monitor progress without needing to visit companies in person.

7. Your profile

Open **Profile** from the sidebar to view your registered details: full name, email, school name, and department.

8. Getting help

If you run into any issue, open **Help & Support** from the sidebar. You can browse supervisor-specific FAQs, send a message to the admin team, or find the support contact details.
